## Starting pay for fresh uni grads hits new high

Business, economics and computing graduates saw the biggest salary jumps

Amelia Teng Education Correspondent

Fresh university graduates earned a higher starting pay last year, with some getting as much as \$4,000 to \$5,000 a month in areas such as

\$5,000 a month in areas such as business and computing.

They took home a median monthly salary of \$3,400, up from \$3,300 in 2016, according to results of a joint graduate employment survey released yesterday.

The starting pay is the highest since 2012, the first year of the annual survey of graduates from the

since 2012, the first year of the annual survey of graduates from the National University of Singapore (NUS), Nanyang Technological University (NTU) and Singapore Management University (SMU).

Fresh graduates with degrees in business economics and compute

business, economics and computbusiness, economics and comput-ing saw the biggest pay jumps. For instance, NUS business administra-tion graduates earned \$3,500 last year, up from \$3,100 in 2016. Those with a double degree in

business and computing from NTU earned \$5,000, compared with

earned \$5,000, compared with \$4,600 in 2016.

About 88.9 per cent found jobs within six months of their final examinations, a slight dip from 89.5 per cent in 2016. This refers to graduates in full-time, part-time, temporary or freelance work.

But the proportion of graduates who secured full-time permanent jobs fell from 79 9 per cent in 2016.

to 78.4 per cent last year.

More went into freelance work -2.4 per cent, compared with 1.7 per cent in 2016. The proportion in part-time or temporary jobs stayed at about 8 per cent.

The survey, conducted last No-vember, polled 11,628 fresh gradu-

vember, polled 11,628 fresh gradu-ates of full-time courses from the three universities. Human resource experts said the dip in full-time permanent employ-ment is not worrying as fresh graduates have other priorities.

Managing director David Leong of recruitment firm PeopleWorld-wide Consulting said: "Many will

choose either to further their edu-

choose either to further their edu-cation or go for a long overdue holi-day before working."

They also have other options, such as freelance work and being an entrepreneur, he added.

Managing director Ronald Lee of Primestaff Management Serof Primestaff Management Ser-vices said: "Some graduates are very specific about what they want in full-time jobs. Some of them are more open to venture into small businesses."

Wages are also rising because of a tight labour market and more positive economic outlook in the past one to two years, said HR experts.

According to figures last month from the Ministry of Manpower, real median incomes for Singaporeans in full-time work rose by 5.3 per cent year-on-year as of June last year, up from the 1.3 per cent growth in the previous year.

"The median pay of \$3,400 for fresh graduates will edge up over time, and this is unlikely to be a one-off peak," said Mr Leong.

Mr Lee said: "Degrees in not just computing but areas like economics and analytics are very rele-

nomics and analytics are very relevant today because of the e sis on big data, artificial intelli-gence and innovation. "Computers generate a lot of data, and you need people who can translate all of it into useful infor-mation for companies." Ms Li Chuqiao, 22, who gradu-ated last year from NTU with a dou-led does not have in the state of the state of the state of the ledge of the state of t

ble degree in business and comput-

big degree in obsiness and comput-ing, has been a business analyst with Deutsche Bank since last July. "The combination of both areas - which are in high demand by in-dustry - makes it easier to find a job," she said.
