Singapore Management University Spearheads Education Innovation with the Desire2Learn Integrated Learning Platform, Raising User Satisfaction Rates from 70% to 85%

PUBLISHED ON JULY 1, 2014

KITCHENER-WATERLOO, ONTARIO, Jul 01, 2014 (Marketwired via COMTEX) -- Desire2Learn (D2L), the learning technology company that created the world's first truly integrated learning platform (ILP), today announced that Singapore Management University (SMU) has successfully implemented innovative models to personalize the student experience using the D2L ILP.

Home to over 8,300 undergraduate and postgraduate students, SMU has a reputation for pushing the boundaries in teaching innovation, creativity and academic excellence.

Professor Pang Yang Hoong - Vice Provost (Undergraduate) and Dean, School of Accountancy at SMU - said the university differentiated itself by pioneering a unique pedagogy that involved an interactive, participative seminar style of learning in small class sizes.

The D2L ILP, known as "eLearn" in the university, creates a seamless and pervasive learning environment that, according to Mr. Lau Kai Cheong, Chief Information Officer and Vice President at SMU, "transcends across the physical and virtual learning spaces." This enables SMU to create a blended learning model to complement its unique interactive pedagogy.

To raise student engagement and success rates, SMU has embarked on a strategic initiative to harness the power of big data analytics. "In the area of predictive analytics, the D2L analytics solution gives us insights into students' learning behavior so we can modify learning strategies and provide timely intervention to deliver better learning outcomes," Mr. Lau said.

Assistant Professor Kenneth Huang from SMU Lee Kong Chian School of Business said the adaptive learning technologies from D2L allow SMU to customize learning journeys to suit the needs of individual students, offering the right content at the right time. "The system provides a personalized experience. Different groups of students can be given different sets of materials based on their answers to questions or responses to instructions," he said. "As a result, the instructor doesn't have to spend excessive time and effort trying to customize materials for each sub-set of students - it can be done effectively and efficiently on the eLearn platform."

The open, flexible architecture and extensibility of the D2L platform enables SMU to develop custom applications in-house and integrate them seamlessly with the Desire2Learn Learning Environment. The Peer Evaluation Tool is one such example of a custom development SMU has introduced to foster collaboration and peer learning.

These tools, together with mobile applications and social learning tools from D2L, have created a fully integrated platform that enriches the learning experience of students at SMU. "D2L has a clear development roadmap with a lot of product innovations that will keep SMU attuned to the changing education landscape," said Mr. Lau. "We pride ourselves as a leader in learning and teaching, as well as academic research."

SMU has made significant progress in international rankings in recent years. Its School of Economics was ranked first in Asia in the Tilburg University Top 100 Worldwide Economics School Research Ranking, based on contributions from 2009-2012, and its Lee Kong Chian School of Business was ranked second in Asia by University of Texas, Dallas for research contributions from 2009-2013.

Mr. Lau said the university sees D2L as a strategic partner in advancing its institutional goals: "We have been very satisfied with the implementation of the D2L system," he said. "The user satisfaction rate rose from 70 percent to 85 percent in 2013. The main reason for such high satisfaction levels is the usability of the platform."

For details on how SMU is using the D2L integrated learning platform to deliver a pervasive and personalized learning experience, please view the video:http://www.desire2learn.com/resources/video/view/?id=1_0lfgnjdv .

About Desire2Learn

Desire2Learn (D2L) is the pioneer of the integrated learning platform, delivering an engaging and personalized learning experience for every individual. With a focus on improving the learning experience, the company partners with thought-leading institutions and organizations to accelerate learning and improve results.
