Singapore Management University Integrates X_TRADER® in Master of Science in Quantitative Finance Program

PUBLISHED ON AUGUST 12, 2014

CHICAGO & SINGAPORE, Aug 12, 2014 (BUSINESS WIRE) -- Trading Technologies International, Inc. (TT) and the Singapore Management University today announced that TT's X_TRADER® software is now being used in the university's Master of Science in quantitative finance program within the market microstructure course curriculum.

The Singapore Management University joined TT's University Program in 2011 and has progressively incorporated TT's software within its coursework. X_TRADER is already being used in the Quantitative Trading Strategies class, which is a requirement for students pursuing a Bachelor of Business Management degree in quantitative finance.

"Our faculty is delighted to have Trading Technologies software available to incorporate into our curriculum. Students are even more excited about the possibilities for developing and testing trading algorithms on this platform," stated Professor Christopher Ting, academic director for the Master of Science degree in quantitative finance at the Singapore Management University.

X_TRADER was donated through TT's University Program. The University Program equips schools with software, and universities in turn apply it to their curriculum as they see fit. Universities benefit from TT's innovation while TT benefits from their feedback and application. The program currently includes more than 55 universities in 10 countries throughout North America, Europe, the Middle East and Asia.

"It's very exciting to have Singapore Management University, which has a strong reputation for excellence in research and teaching, utilizing our software in their curriculum. Our collaboration creates tremendous learning opportunities and helps prepare the next generation of financial professionals for the marketplace. We are glad to be further strengthening our relationship with SMU," said Leo Murphy, TT's University Program manager.

Through its University Program, TT works with undergraduate and graduate educators in business, financial engineering, math and computer science programs to prepare students for careers in finance and the futures markets. Universities incorporate X_TRADER and its components in coursework and on-campus trading labs, allowing students to learn about and experience trading in a simulated environment using the same tools and market data as the industry's leading professionals. TT staff also guest lecture at partner schools and occasionally host classes at TT's offices.

About Trading Technologies

Trading Technologies (www.tradingtechnologies.com , @Trading_Tech) develops and delivers professional trading software for a wide variety of users including proprietary traders, brokers, money managers, CTAs, hedge funds, and commercial hedgers and risk managers. TT provides access to 40 major international exchanges and liquidity platforms. Its recently unveiled next-generation trading platform uses web-based services to give users a fast, reliable, mobile solution that represents what's next in the world of trading and technology.

About the Singapore Management University

A premier university in Asia, the Singapore Management University (SMU, @sgsmu) is internationally recognized for its world-class research and distinguished teaching. Established in 2000, SMU's mission is to generate leading-edge research with global impact and produce broad-based, creative and entrepreneurial leaders for the knowledge-based economy. It is known for its interactive and technologically enabled pedagogy of seminar-style teaching in small class sizes. Home to over 8,300 undergraduate and postgraduate students, SMU comprises six schools: School of Accountancy, Lee Kong Chian School of Business, School of Economics, School of Information Systems, School of Law and School of Social Sciences, offering a wide range of bachelors', masters' and PhD degree programs in various disciplines.

With an emphasis on generating rigorous, high-impact, multi-disciplinary research that addresses Asian issues of global relevance, SMU faculty members collaborate with leading international researchers and universities from USA, Europe, China and India as well as with partners in the business community and public sector through its research institutes and centers. SMU's city campus is a state-of-the art facility located in the heart of downtown Singapore, fostering strategic linkages with the business and wider community.
