**Singapore, Feb 20 (PTI)** Diversified group Cargill India will start operating its USD 100 million mill in Karnataka by June next year, processing about 800 tonnes of locally sourced corn per day, a top official of the company has said.

"We expect to start production from June next year.

Construction of the mill started recently," the company's Chairman Siraj Chaudhry told PTI here today on the sidelines of a seminar at the Singapore Management University.
