

2022 Q1 SCORES RETAIL AND INFO-COMMUNICATIONS

HOW WELL DID COMPANIES SATISFY THEIR CUSTOMERS?

This chart summarises the results of the CSISG 2022 satisfaction scores in the Retail and Info-Communications sectors at the sector, sub-sector and company levels.

Each sector score (in gold) represents a weighted average of their respective sub-sector scores (in blue). Satisfaction scores for sub-sectors with individual company scores are weighted averages of these individual company scores.

All scores displayed are accurate to one-decimal place. Entities are presented in decreasing levels of satisfaction.

* Companies indicated with an asterisk(*) are companies that have performed significantly above their sub-sector average.

* Sub-sectors indicated with an asterisk(*) are sub-sectors that have performed significantly above their sector average.

The sparklines indicate the satisfaction score of their respective sectors, sub-sectors and companies over the past few years.

Entities shown in this scorecard have samples of $N \geq 50$.

Not Measured
Not Applicable

Customer Satisfaction scores are based on a 0 to 100 scale.

Note 1 In 2020, data collection for the Retail Sector was done via an online methodology and no tourists were measured.

Data shown in the years before 2020, and collected via the face-to-face methodology, cannot be directly comparable to the 2020 scores and should only be used as reference.

Note 2 Video Streaming Services sub-sector was newly added to the Infocomm Sector. Thus, there is no year-on-year comparison.

Note 3 Only locals were surveyed for Wireless@SG due to travel restrictions in light of the Covid-19 situation in 2021. This is as opposed to the years before where both locals and tourists were measured. Thus, there is no year-on-year comparison.

Note 4 In 2022, the PayTV sub-sector was measured online with locals only, as opposed to face-to-face interviews in 2021. Thus, the scores are not directly comparable with the previous and should only be used as reference.

Note 5 Wireless@SG was not measured in 2022.
